

STAND UP FOR SCIENCE

(sung to the tune of "This Land is Your Land" by Woody Guthrie)

Stand up for science-
No time for silence!
The cure for cancer-
We need an answer.
Hear our entreaties-
Cure diabetes.
Science is good for you and me!

For global warming,
The facts come swarming.
Climate denial-
It's suicidal!
You might deny it-
We just don't buy it.
Science is good for you and me.

Don't de-fund science-
Join our alliance!
New forms of energy-
It's time for synergy.
To protect our planet,
Science- don't ban it!!!
Science is good for you and me!

You huddled masses-
Come take our classes.
If you are yearning-
Come here for learning.
And after college-
Please share your knowledge.
Science is good for you and me!

Our Muslim brothers,
Sisters and others:
We stand beside you
And won't deride you
Banned immigration-
Bad for our nation
Science is good for you and me!

Healthcare is our right,
For which we must fight.
Our vision's global
Our cause is noble.
It's our insistence-
Join the resistance!
Science is good for you and me.
